The **Astrea 20.20 Premium** solution is suitable for all types of dairy farming - and the return on the investment is quick.

'A future that makes sense'

PREMIUM

Robust Box Design

- For the cow, the Astrea 20.20 industrial-style box design provides optimum comfort with ample space to move in and out.
- For the milk, bacterial influences are minimized due to the high-performance spray system.
- For the milker, it offers a durable, robust and easy-to-use solution with a long life-span and low maintenance costs.

High-Quality AttachTool

- For the cow, the AttachTool ensures improved udder health, due to the unique and hygienic cleaning process using a separate prep-cup.
- For the milk, the unique cleaning, stimulation and forestripping routine guarantees the best possible milking hygiene and ensures high-quality milk.
- For the milker, its robust design and watertight compartments provide long-lasting durability.

Reliable Vision2Milk Software

- For the cow, Vision2Milk ensures excellent udder health due to a high attachment rate.
- For the milk, high quality milk due to quick, gentle and excellent milking.
- For the milker, it provides greater efficiency due to the extremely accurate teat detection by means of the unique vision technology, thus minimizing the number of failed milkings.

Premium Uniflex Liner

- For the cow, the Premium Uniflex Liner provides a gentle, but extremely effective milking method.
- For the milk, it ensures its gentle distribution, ensuring fat globules remains intact, thus minimizing free fatty acids.
- For the milker, the Premium Uniflex Liner ensures a higher yield whilst also saving costs.
